

WET LEAF REMOVER (WLR)

WET LEAF REMOVER (WLR) EFFECTIVE HAULM SEPARATION

The Van Dijke Wet Leaf Remover (WLR) is the ideal solution to effectively remove haulm, organic parts and other floating materials, such as corn stubble, from the product stream. This multi-purpose machine is designed to be placed either behind the washing line or as a post-wash behind the destoner.

How it works

The WLR consists of a robust main unit with an industrially manufactured PVC discharge conveyor. This specially designed discharge conveyor is lighter, stronger and has a significantly longer lifespan than traditional web conveyors. In addition, the conveyor meets food-safety requirements and is finished in blue for better visual inspection.

At the rear of the unit is a pump tray integrated into the main unit. This pump tray has an overflow and allows water to be pumped to the main unit using a submersible pump. The produce sinks through the water flow and lands on the product discharge conveyor. The lighter parts, such as foliage and other organic materials, are forced backward by the water stream and separated from the water via a filter belt. The filtered materials are then discharged to the side of the machine.

KEY BENEFITS:

COMPACT UNIT, MULTIPLE CAPACITIES
AVAILABLE

MULTIFUNCTIONAL:
SEPARATING AND POST-WASHING ACTION

AVAILABLE IN BOTH STAINLESS STEEL AND GALVA

SIMPLE OPERATION

INDUSTRIAL HEAVY-DUTY QUALITY

EFFICIENCY AND VERSATILITY

The WLR not only offers a solution for the removal of leaves and other floating parts, but is also extremely suitable for the removal of rejects such as glass or hollow hearts. Its operation is based on the difference in specific gravity between the product to be processed (which sinks) and the unwanted parts (which float).

With the Van Dijke WLR, you not only remove the unwanted parts from your product stream, but also increase the efficiency of your processing process. It is an indispensable tool for any production environment striving for optimal product quality.

**EXCELLENT
QUALITY**

**EXTREME LOW
WATER CONSUMPTION**

**SMART DIRT
REMOVAL SYSTEM**

AVAILABLE CAPACITIES

Type:	WLR800	WLR1000	WLR1200
Capacity [t/h]:	up to 25	up to 45	up to 80
Size LxWxH [mm]:	5.300 2.000 1.900	5.300 2.200 1.900	5.300 2.400 1.900

ABOUT VAN DIJKE

Van Dijke Groep has been a reliable partner for innovative machines and systems in the AGF industry for more than 60 years. Our focus is on delivering high quality machines with low water consumption, smart solutions and excellent service. We help you to optimize your production processes.

Contact us today and discover the benefits of the Van Dijke Wet leaf Remover for your production process!
